PMI® AUTHORIZED
ACP® EXAM PREP WORKSHOP

Prove Your Agile Experience Run Deep.
Demonstrate Your Ability to Lead Agile Teams
to Excellence!

PMI-ACP®

PMI-ACP® certification validates that you are highly skilled in:

Understanding and applying multiple agile approaches including Scrum, Lean, Kanban, and Test-Driven Development.

Engaging stakeholders effectively to gather requirements, incorporate feedback, and ensure project success.

Delivering value to customers through iterative development cycles and employing agile metrics for informed decision-making.

Why earn PMI-ACP® certification?

Earning your PMI-ACP® certification is the perfect way to demonstrate your knowledge of and commitment to this rapidly growing approach to project management. It showcases your agile training, experience, and a depth of knowledge on agile practices, tools and techniques. Plus, it's the only certification that validates expertise in multiple agile approaches.

PMI-ACP® certificate is for those who wants to increase their knowledge base and skills in Agile practices. This Training will provide you in-depth knowledge on different Agile methodologies such as Kanban, Lean, Extreme Programming etc. It is a 'MUST' for those who want to learn and experience the skillsets that are extremely important if he/she wants to deliver the project completely in Agile way. Also, Star Agile is in line with the changes made by PMI of adding Agile Practice Guide as a new reference material for those who are preparing for PMI-ACP exams.

Workshop Description

Agile is quickly becoming the go-to method of project management for a wide range of industries —from manufacturing to finance to health care. Having a PMI-ACP® will raise your visibility as the solution to what employers need to stay competitive in today's business environment.

For some types of the projects applying the previous thinking of "planning first and then doing things" can't push the project forward at all. Therefore, we need adopt an agile method to manage projects that are constantly changing, which enables project managers to have the ability to respond quickly. The PMI-ACP® certification verifies a practitioner's ability to understand, apply agile principles, and practice on projects. It differs from other certifications in that it requires a combination of agile training, agile project work experience, and exams that include agile practices, tools, and skills. It also incorporates other agile methodologies including SCRUM (Agile Development), XP (Extreme Programming) and Lean Development (Lean-Agile).
